More Than Asphalt, Concrete, and Steel 1997 The Intermodal Surface Transportation Efficiency Act of 1991 (ISTEA) encourages the mainstreaming of environmental, cultural, and social considerations in every aspect of transportation planning and development. ISTEA has paved the way for non-traditional projects by creating "flexible funding". This unprecedented tool enables state and local decision makers to look beyond traditional highway and transit agendas. It empowers them to spend highway dollars on "the most appropriate" transportation solutions for their needs. They have chosen transportation activities ranging from renovating an historic bridge to realigning a main street to redesigning an entire transportation system. This booklet presents some of their exemplary environmental projects and processes.

Sexual Mutilations George C. Denniston 2013-03-09 Sexual mutilation is a global problem that affects 15. 3 million children and young adults annually. In terms of gender, 13. 3 million boys and 2 million girls are involuntarily subjected to sexual mutilation every year. While it is tempting to quantify and compare the amount of tissue removed from either gender, no ethical justification can be made for removing any amount of flesh from the body of another person. The violation of human rights implicit in sexual mutilation is identical for any gender. The violation occurs with the first cut into another person 's body. Although mutilation is a strong term, it precisely and accurately describes a condition denoting "any disfigurement or injury by removal or destruction of any conspicuous or essential part of the body. " While such terms as "circumcision" and "genital cutting" are less threatening to our sensitivities, they ultimately do a disservice by masking the fact of what is actually being done to babies and children. Although the courageous example of the survivors of sexual mutilation indicates that humans can certainly live and even reproduce without all of their external sexualorgans, this biological phenomenon does not, however, justify subjecting a person to sexual mutilation. The remarkable resilience of the human body is a testament to the importance nature places on reproduction rather than a vindication for surgical practices that compromise this function.

Successful Response Starts with a Map National Research Council 2007-01-19 In the past few years the United States has experienced a series of disasters, such as Hurricane Katrina in 2005, which have severely taxed and in many cases overwhelmed responding agencies. In all aspects of emergency management, geospatial data and tools have the potential to help save lives, limit damage, and reduce the costs of dealing with emergencies. Great strides have been made in the past four decades in the development of geospatial data and tools that describe locations of objects on the Earth's surface and make it possible for anyone with access to the Internet to witness the magnitude of a disaster. However, the effectiveness of any technology is as much about the human systems in which it is embedded as about the technology itself. **Successful Response Starts with a Map** assesses the status of the use of geospatial data, tools, and infrastructure in disaster management, and recommends ways to increase and improve their use. This book explores emergency planning and response; how geospatial data and tools are currently being used in this field; the current policies that govern their use; various issues related to data accessibility and security; training; and funding. **Successful Response Starts with a Map** recommends significant investments be made in training of personnel, coordination among agencies, sharing of data and tools, planning and preparedness, and the tools themselves.

Strategic Operations Management Steve Brown 2007-06-01 This is a substantial new edition of a successful textbook which continues to have a sensible and 'easy to read' style. Each Chapter has a past/present/future theme with a real strategic approach. **Strategic Operations Management** shows operations as combining products and services into a complete offer for the customer. Services are therefore seen as key and are integrated throughout the material in each chapter. Manufacturing, service supply and other key factors are all shown to be in place. In an era where companies are fond of talking about core competences but still struggle to understand their operations, this is an important for academics and practitioners alike. Only when managers understand their operations will they be able to leverage them into any sort of capabilities that will lead to competitive advantage. Online tutor resource materials accompany the book.

Business Law Ewan MacIntyre 2005 It includes the English legal system and dispute resolution; the law of contract; sale of goods and the supply of services; agency; the law of torts; consumer credit; company and partnership law; employment law; intellectual property; trade descriptions; misleading prices and product safety. The integrated approach taken emphasises the policy behind the law and how different areas of law are interconnected.

Elliott and Quinn Catherine Elliott 2006 Now in its third edition, **AS Law** continues its clear explanation of the law, allowing students to enjoy learning, and providing a pathway to examination success. Throughout the text, critique of existing law, law reform proposals and commentary are discussed to stretch students understanding and give them the confidence to tackle essay and examination questions. Newspaper articles and photographs on topical cases are included, keeping the law fresh and engaging. The new edition includes the Constitutional Reform Act

2005 which introduces the radical constitutional reforms of the Labour governments and the increase police powers contained in the Serious Organised Crime Police Act 2005.

Consumer redress for misleading and aggressive practices Great Britain: Law Commission 2012-03-28 This joint report by the Law Commission and Scottish Law Commission considers the redress available to consumers who have been the victims of misleading or aggressive practices by traders. Currently consumers have to rely on private law rights if they want to take action. The Commissions' review found current private law in this area to be fragmented, complex and unclear, and recommends new legislation to provide redress to consumers who experience misleading and aggressive practices in their dealings with traders. The aim is to clarify and simplify the current law on misleading practices, and to improve the law on aggressive practices by filling the gaps in the current law. Limited reform, targeting the most serious causes of consumer detriment, is proposed. The report follows the Consumer Protection from Unfair Trading Regulations 2008 in most, but not all, respects.

Recommendations are made on liability and remedies. Consumers would have the right to unwind the transaction (get a refund), or receive a discount on the price. Additional damages may be recoverable to compensate for additional loss. The report also considers the specific area of unfair payment collection.

Scars, Marks & Tattoos Jacqueline Caruso 2021-03-31 I have physical scars from past surgeries, however, I have emotional scars as well. They were buried deep inside (hidden). It wasn't until my mother died was I able to "catch my breath" and to make sense of or process the emotional pain I had endured due to her prescription drug addiction, resulting in my own addictions.

Parentology Dalton Conley 2014-03-18 An award-winning scientist offers his unorthodox approach to childrearing: “Parentology is brilliant, jaw-droppingly funny, and full of wisdom...bound to change your thinking about parenting and its conventions” (Amy Chua, author of *Battle Hymn of the Tiger Mother*). If you're like many parents, you might ask family and friends for advice when faced with important choices about how to raise your kids. You might turn to parenting books or simply rely on timeworn religious or cultural traditions. But when Dalton Conley, a dual-doctorate scientist and full-blown nerd, needed childrearing advice, he turned to scientific research to make the big decisions. In *Parentology*, Conley hilariously reports the results of those experiments, from bribing his kids to do math (since studies show conditional cash transfers improved educational and health outcomes for kids) to teaching them impulse control by giving them weird names (because evidence shows kids with unique names learn not to react when their peers tease them) to getting a vasectomy (because fewer kids in a family mean smarter kids). Conley encourages parents to draw on the latest data to rear children, if only because that level of engagement with kids will produce solid and happy ones. Ultimately these experiments are very loving, and the outcomes are redemptive—even when Conley's sassy kids show him the limits of his profession. *Parentology* teaches you everything you need to know about the latest literature on parenting—with lessons that go down easy. You'll be laughing and learning at the same time.

Quattro Jeremy Walton 2020-09-15 The word 'Quattro', chosen by Audi for its pioneering high-performance four-wheel-drive cars, immediately captures glamour and excitement in the minds of all motorsport enthusiasts. This book, written by a leading journalist and Quattro devotee, explores 24 years of factory-prepared and factory-supported Quattros in motorsport, from 1980 to 2004. It is a tale that extends from rough rally stages to race tracks, from pine-fringed ice trails in the depths of European winters to the shimmering heat haze and melting asphalt of Texas street racing. Along the way, it explains how Quattros collected four world rally championships, five American driver/manufacturer crowns and a single-year haul of seven international touring car titles, plus

numerous other honours. With the five-cylinder turbocharged Quattro in its original form, rallying in the early years yielded numerous wins, most of all in 1982, when seven victories in 11 world championship rallies brought the first title. With the short-wheelbase Sport added to Audi's armoury, 1984 became an all-action, all-conquering rallying season with two more world titles won, for drivers (Stig Blomqvist) and manufacturers. Three stunning Pike's Peak wins were achieved in America in successive years, for Michele Mouton (1985), Bobby Unser (1986) and Walter Röhrl (1987). Starting with double championships for the 200 quattro in TransAm (1988) and the 90 Quattro in IMSA (1989), racing success unfolded in America. Exuberant Hans Stuck was the star driver, but consistent team-mate Hurley Haywood captured that 1988 title. Touring car campaigns during the 1990s brought huge success, starting with fearsome V8 Quattro 'racing limos' in Germany. Global achievements followed with A4 Quattros in many national Super Touring series throughout Europe and in Australia, including Frank Biela's 1996 title-winning campaign in Britain. Audi continued to win on track in the new millennium as race versions of the S4 and RS6 captured five SCCA GT Championship titles in America.

Street Addressing and the Management of Cities Catherine Farvacque-Vitkovi? 2005 There has been a dramatic demographic shift from rural areas to cities in sub-Saharan African countries over the last few decades. This continuing urbanisation trend has created new challenges for local governments in terms of managing urban services, since over half of the city streets in these countries have no names or addresses, and the problem is

particularly acute in the poorest neighbourhoods. This publication examines the use of street addressing initiatives to address this problem, giving information on current and future applications, considering examples of use in many African countries, and setting out a methodological guide for implementing such initiatives.
